Draft program. Times, talks and speakers may still change.

2026 Asia-Pacific Solar Research Conference

Open-Source Energy System Modelling Workshop

Monday 30 November 2026
11:00 am for an 11:30 am start • Finishes 4:00 pm, followed by networking
Australian National University, Canberra • In person only • Supported by RACE for 2030

11:00 — 11:30 am	**Arrival, tea & coffee** Informal catch-up and networking before the official start.
11:30 — 11:45 am	**Welcome & introduction** Opening remarks from RACE for 2030, then an overview of the day from the organisers, housekeeping, and an introduction to the all-day activities.
11:45 am — 12:15 pm	**'Short-circuit' talks, part 1** Five-minute 'lightning talks' on open-source projects, tools and datasets. NEMX.jl: an open-source Julia package for NEM dispatch modelling Ghulam Mohy Ud Din (CSIRO) Open-ISP: an open-source electricity system model based on AEMO's Integrated System Plan Ellie Kallmier (UNSW) Resource Adequacy, Risk, and Resilience in Low-Carbon Energy System Planning: Methods, Tools, and Metrics Tim Kopka (UniMelb) Energy Research Information Stack (ERIS) Michael Thomas (ANU) Model-Based Systems Engineering for Alumina Decarbonisation Adnan Qamar (CSIRO) How open is your modelling? Dora He (ANU)
12:15 — 12:45 pm	**Open floor: demos & discussion** Part 1 presenters host tables for demos, questions and discussion. Explore the projects that interest you.
12:45 — 1:30 pm	Lunch
1:30 — 2:00 pm	**'Short-circuit' talks, part 2** Five-minute 'lightning talks' on open-source projects, tools and datasets. Modelling green industrial hubs in Indonesia Jenny Haywood (CSIRO) Historical Weather Trace dataset (TBC) Daniel Condon (AEMC) Modelling investment uncertainty: agent-based modelling to quantify economic uncertainty Markus Mannheim (DCCEEW) OPF tools and 'experiments in the browser' Fred Geth (UQ) BMOPF tools (TBC) Sleiman Mhanna (UniMelb) FIRM Tim Weber (ANU)
2:00 — 2:30 pm	**Open floor: demos & discussion** Part 2 presenters host tables for demos, questions and discussion. Explore the projects that interest you.

DRAFT

2:30 — 3:30 pm	**Panel session** Presentations and a panel on ideas, issues and practice in open-source energy modelling, opening up to questions and discussion from the floor. Trustworthy Computational Research in the Age of AI Archie Chapman (UQ) Interoperability in open-source energy modelling tools Michael Thomas (ANU) Open-source modelling at CSIRO James Foster (CSIRO) Building communities around open-source energy models Fred Geth (UQ)
3:30 — 4:00 pm	**Wrap-up & next steps** Reflections from the day's activities and a discussion of what this community wants to do next.
From 4:00 pm	Networking Informal drinks and conversation.
